

Who we are

- The Climate Ethanol Alliance is a global partnership representing interests in the US, Europe, Canada, Brazil and Asia.
- Its mission is to advance renewable ethanol as an alternative to oil and promote evidence- and science-based policymaking to decarbonize transport.
- The Climate Ethanol Alliance brings together bioethanol producers, service providers, and input suppliers to support the climate action goals of the Paris Agreement and facilitate the accelerated transition of the transport sector towards low carbon.

Who we are

CEA was founded in 2024 and growing

Ordinary members

Supporting members

Priorities

- Revisiting the image of ethanol
- High octane fuels in road transport (E20, E30)
- Carbon removal - Fermentation Carbon Capture and Storage
- Low carbon marine fuels

Trade policy is not part of the mandate
